

## The Five Protective Factors

*A Videoconference Offered in Fifteen Minnesota Locations*  
**Tuesday, November 20, 2007 from 1:30 P.M. – 3:30 P.M.**

Prevent Child Abuse Minnesota (PCAMN) with the Department of Human Services presents a statewide videoconference about the power and importance of the Five Protective Factors. Research has shown that the Five Protective Factors are conditions in families and communities that, when present, increase the health and well-being of children and families. They are attributes that serve as buffers, helping parents who might otherwise be at risk of abusing their children to find resources, supports, or coping strategies that allow them to parent effectively, even under stress. The videoconference will be a time learn about the research behind the Five Factors, as well as hear from community organizations that are using the Five Factors to help build strong families and children. There will be a time for information sharing, and we look forward to hearing from many communities and programs about how they promote the Five Factors.

### Workshop Locations
