

2016 Collaborative Report

Infographic

There are currently 90 state-sanctioned Children's Mental Health & Family Services Collaboratives serving communities across Minnesota. Collaboratives promote promising prevention & early intervention strategies through an expansive public health approach encompassing all developmental dimensions of well-being, including cognitive, social, emotional, behavioral, physical, environmental, economic, spiritual, educational & vocational.

The mission of the Collaboratives is to coordinate & integrate resources & services for children, youth & families who face complex problems & are involved with multiple service systems.
